Toilet odor blocking system, methode of use with water inline T adapter and toilet bidet

Abstract

The object of this invention is create an inexpensive toilet odor blocking system with low maintenance cost to block any or all odor from escaping from the toilet bowl by generating a continuous stream of bubbles to cover human waste, same system with higher water volume becomes a toilet bidet by using a special bubble/bidet adapter. In toilet bidet mode it uses limited water quantity diverted from the toilet tank valve or continuous water stream from a new art, the in line water adapter with bullock threading. This adapter is capable to be inserted between the toilet tank valve and toilet water hose providing a compressure fitted extra outlet for bidet, for odor blocking or for any other bathroom use.
